《Workshop Theme》

Africa and Asia are two regions of great geopolitical significance. They are also currently in a significant and inevitable relationship where Japan and the rising giants of Asia, China in particular, are in competition with the West in terms of relevance and influence on the African continent. Africa, on her part, is largely undergoing a steady socio-political renaissance as well as experiencing an unprecedented rapid economic growth. This inaugural workshop will kick-start what ultimately is the main mission of the Afro-Asian Studies Initiative, namely, the creation of an intercultural and intergenerational linkage and dialogue on issues that affect both the African and Asian continents.
